

NATIONAL TIDE GAUGE INFORMATION
 ADVISORY: For the availability of tides, see the National Tide Gauge Information on page 1 of this chart. For more information on tide gauges, see the National Tide Gauge Information on page 1 of this chart.

NAVAL WEATHER RADIO BROADCASTS
 The following table lists the broadcast frequencies for the Naval Weather Radio stations in the San Francisco Bay area. For more information, see the National Tide Gauge Information on page 1 of this chart.

Station	Frequency	Power
San Francisco	162.400 MHz	100 W
San Francisco	162.410 MHz	100 W
San Francisco	162.420 MHz	100 W
San Francisco	162.430 MHz	100 W
San Francisco	162.440 MHz	100 W
San Francisco	162.450 MHz	100 W
San Francisco	162.460 MHz	100 W
San Francisco	162.470 MHz	100 W
San Francisco	162.480 MHz	100 W
San Francisco	162.490 MHz	100 W
San Francisco	162.500 MHz	100 W

CAUTION
 SURFACE CURRENTS: The surface currents in the San Francisco Bay area are highly variable and may be strong. Mariners should exercise caution when navigating in this area.

CAUTION
 SHALLOW WATERS: The shallow waters in the San Francisco Bay area are highly variable and may be strong. Mariners should exercise caution when navigating in this area.

LOTRAN LINEAR INTERPOLATOR
 The Loran Linear Interpolator is a device used to interpolate depth soundings between two adjacent soundings. It is used to determine the depth of a vessel at a specific location.
